How Artificial Intelligence is Helping M&A Dealmakers In a Remote Environment

Cengiz Satir SVP, Product & Design Intralinks

William Jefferson Black Managing Director Finance Information Group

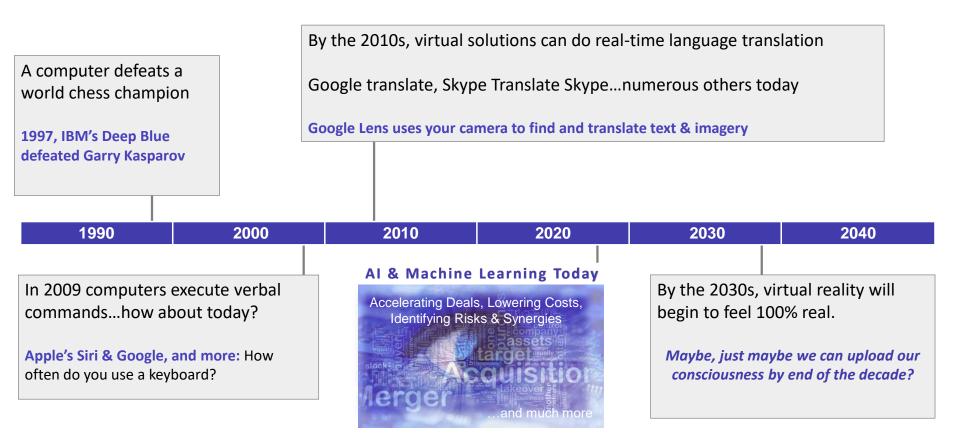

Ben Collins Senior Director, Product Marketing Intralinks

Impact of Artificial Intelligence for your business?

\$16 Trillion ... AI's potential boost to the GDP by 2030

What is Artificial Intelligence and How Real Is It?

How do we optimize data & design experiences in ways that develops trust, whereby both machines and humans learn from each other?

Machine Training vs. Machine Learning

Human-in-the-loop A

Artificial Intelligence & Ethics

The Question?

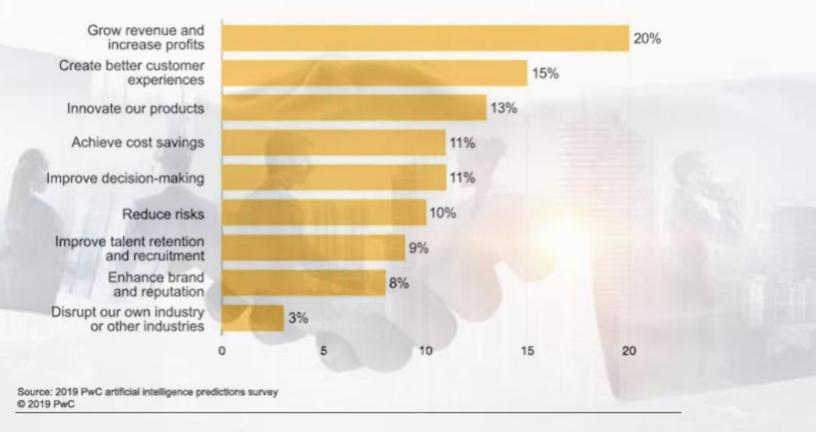

How can we leverage Machine Learning to create momentum in a transaction?

The Challenge

Identifying documents that contain, risk & synergies that can help **shape the value of a deal**

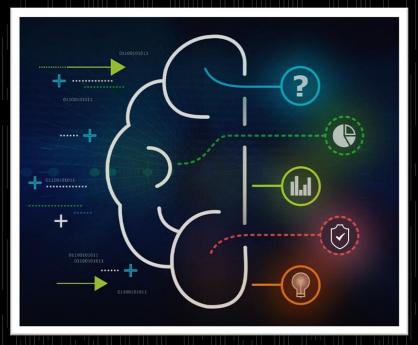

What value do you expect from AI Investments?

Embracing the power of AI in M&A

With the right kind of intelligent automation & AI-assisted experiences, businesses can:

- Increase productivity & efficiencies, because they know how the diligence team is progressing
- Enable Dealmakers with the ability to proactively shine a light on synergies and risks,
- Deliver a more effective means where you can identify and protect sensitive data at scale
- Create a competitive edge in pursuit of current deals, as well as drive long-term growth

Q&A
