Stephanie is the President and CEO of Amerikam, Inc., a designer and manufacturer of products and components for the medical, defense, aerospace, transportation, gas and oil, and equipment markets.

Under her direction at Amerikam, the business has expanded patented designs in projects that have made life easier for the handicapped, facilitated space travel, safeguarded our military troops and contributed to water conservation.

Stephanie's professional career includes leadership positions with AMCA International and North American Philips Corporation. Early in her career, she established a work study program at Mt. Union College, now University of Mt. Union that served as a model for many schools of business throughout the United States. In addition to her studies at Mt. Union and Kent State University, Stephanie was awarded an Honorary Doctorate in Business and Industry from Ferris State University.

Her professional activities and associations have included serving on the community Board of Directors of Chemical Bank, Economic Club of Grand Rapids, Grand Rapids Chamber of Commerce, Xavier University Medical Device Supplier Integrity Group, Ferris State University Foundation Board, International Center for Entrepreneurship and Talent 2025.
